I have basic Photoshop knowledge but Im not that good at it.Q: Converting an Access Database to SQLite I have an Access Database with many records. I need to convert it to an SQLite database for a mobile. It is not important that the database is just for mobile. The application I'm using is a C# desktop application. I think I can use a tool like SQLiteStudio but I don't know what tool I need to be able to do this fast and efficiently. I also heard that SQLiteStudio is not reliable. What would be a reliable tool to do this? A: I think SQLiteStudio it's not very powerfull. An alternative to do this job is Scriptoma. It's easier to use and not ask for a license on their website. I think is faster and better for this type of work. A: I'd recommend SQLite Database Browser. A: SQLite Database Browser is free and it works very well. You'll need to use the "Export..." option. The output folder should already exist, but if you don't create one, it'll create the one for you. NOTE: The only reason SQLite Database Browser doesn't mention it when it imports databases is because it's already named to import a database. edit: All you need to do is to link your output file to the database you want to import. It'll search through the database for the current location and then generate the import file using that location. Jun 19, 2010 I played
