R.W. Flash Drive Explorer Crack Patch With Serial Key X64

R.W. Flash Drive Explorer is a tool created to give you the means to protect your important files by encrypting them. It uses 128 bit encryption and secures your files under a custom password. The tool is designed to work with Flash drives as it's capable of encrypting files which are located on such storage devices. Moreover, for it to properly function, you need to install it on the USB device you intend to use. The entire installation process is very simple and should pose no problems to you. Organize files and encrypt them Since there is a chance that you want to protect more than just work files or personal documents and don't want to make a mess of them, the application enables you to sort content into categories such as 'pictures', 'videos', 'music', 'archives', 'softwares' and 'others'. Content can be manually sorted by copying the files yourself from one location to the other, or by using the 'Autosort' function. With it you are able to choose multiple files from all over your computer's hard drive and with one click, R.W. Flash Drive Explorer does the rest. The application can tell files apart because it comes with predefined file formats and category associations and you can add your own if they are not available. Easy to encrypt files R.W. Flash Drive Explorer makes it simple to protect your files via encryption. All you have to do is copy the files on your Flash device into the previously mentioned folders and with a simple click of a button, the application secures them. Backup and restore documents Besides preventing unauthorized access to your files, the application also enables you to create backups for them. Just like with encrypting, the entire backup process is simple. All you have to do is access the function from a drop-down menu, choose the folders you want to backup and with yet another click, the files are duplicated and moved to the location you specify. Protect files on your USB drive In closing, R.W. Flash Drive Explorer proves to be a quite practical and handy tool to use if you want to both protect important documents on your Flash drive as well as create backups for them. Size: 176 KBThe present invention relates to non-volatile memories, particularly flash electrically-erasable and programmable read-only memories (Flash EE
