Tabbed Explorer Crack + (April-2022)

Tabbed Explorer replaces Windows Explorer, which is the standard program that allows users to browse files. While it comes pre-installed in Windows, it lacks advanced features that more advanced tools offer. After Tabbed Explorer installation, users can open new Explorer windows as tabs from existing explorer windows, leaving plenty of space on the desktop. Besides that, it also has a tab menu which allows users to easily open multiple explorer windows, thus allowing users to find what they need faster. Closing a tab is easy to do, either through the main menu or by the keyboard shortcuts. Besides, the program is stable, as it does not crash on the user's machine.
