4 Answers 4 I am not familiar with the CD70; however, I am familiar with the DVD90 and in my experience, you must buy a specific DVD90 Navi Software Language disc set (with UK English and Norwegian versions), or, more likely, the CD70 Navi with Polish and Italian versions. The reason is that the DVD90 Navi and CD70 Navi Navis are different: one has the UK English and Italian versions, and one has the Polish and Italian versions. I was surprised to find that neither of these are bundled together. I am assuming that the CD70 has the Polish and Italian versions. If you cannot find these, you may have to manually download the Polish/Italian version Navi disc set (they are bundled together). I would be happy to buy this if you could. I found these discs in the following places - in England, as I live in the UK: some parts stores (I believe I had to show my passport to get the UK English discs) Autogeeks (although the disc I bought online was more expensive than the part store price) which had the discs in the car, but when I went to get one, they were out of stock, and the staff said I would have to wait to get one sent from their UK warehouse. Amazon UK has them for £9.99 (and a lower price for UK English versions in Northern Ireland). I went through every single dealer in my area, and was unable to find any copies of the discs anywhere in my area. Note that Autogeeks has an online catalogue of cars, parts, etc. that they can access, so if you want a particular disc or part, you can check there. OEM CD70 DISC is "OMV" in English, Japanese and Korean language. For regional menus are sold separately (I have MTF CD70/DVD90 that has menu in three languages). This disc should be in your car. OEM CD70 DVD90 NAVI DISC "Cerberus" (or "Chery") is "Vauxhall" in Polish language and "Opel" in Italian language. For additional regional menus, they are also sold separately (I have the DVD90 that has regional menus in Polish and Italian). If you don't have the correct discs, please search on Google for "Vauxhall CD70 DVD90 (Polish
