History Autodesk's AutoCAD started in 1991 as a visual programming tool for mechanical design. It was initially marketed as the first 3D vector graphics system available for personal computers, even though others were available before and are still available today, such as Adobe Illustrator, Corel Draw, FreeHand, Inventor and MicroStation, as well as older 3D programs. In the late 1990s, after the launch of Microsoft Office and the arrival of the internet and the World Wide Web, many customers turned to web-based GIS software. As a result, many Autodesk customers moved to AutoCAD LT or Virtual AutoCAD. AutoCAD 2012 (formerly AutoCAD R14) was released in August 2009. As a part of the January 2010 release, AutoCAD (R13) won a "Product of the Year" award from TrustedReviews. Wednesday, March 18, 2017 Weekly JKT Recap: 18.03.17

Hello and welcome to another edition of Weekly JKT Recap! Here is what I have been up to this week. Weekly JKT Met with My Stylist This week I had my hair done by the amazing Gucci at her new store in Brooklyn! I've never been to this store but I walked in and instantly was drawn to the vibrant colors. I tried on a ton of dresses and even some shoes and ended up loving this blue floral dress with the black and white Peter England T-Shirt (two of my favorite brands). I don't think it was on their website, but I'm pretty sure it was a sample. I thought it was too big at first but after trying it on, I realized that it was exactly what I wanted. I bought it on the spot and I will be wearing it with as many pair of black wedges as I can. I love how the fabric in the Peter England shirt paired with the Gucci floral dress. The black and white was a surprise to me because it wasn't originally in my rotation. I'm always looking for something that will make me feel a bit more polished but still is comfortable for my active lifestyle. I will be wearing this outfit to a meeting at the library in the coming weeks and I love that I can pull this look off with simple sneakers and a black and white t-shirt. Hot Pink & Beige Color Palette I recently

decided to start experimenting with colors more. A lot of times I will wear a neutrals and black palette but I love looking at color palettes that are more playful or cheerful. I'm starting to look at clothing that has more pops of color and not just black and navy blue. The hot pink, beige, and yellow palette on the right is one of my favorites right now. I can't wait to pair this outfit with black wedges and teal tights. Rainbow
