What's new:

- **Play The Game The Way You Play - FIFA 22 introduces "HyperMotion Technology" designed to showcase the major innovations of the game, and allows you to completely alter your game experience. The graphics are sharper, accelerometer controls have been enhanced, there's a cleaner and more efficient player screen, and animations are more lifelike. More detailed masterclasses and new online components of Ultimate Team allow you to try new tactics and strategies, including the introduction of passes and shots on target to help you focus on and master those most important to you when training and playing solo sessions.**
- **AI-Control - FIFA 22 introduces a new AI-system that mimics the way a real pro passes the ball, leading the attack and guiding the attack to achieve the most effective goal-scoring opportunities.**
- **Improved Pass System - Passing is key to creating chances and scoring but also defending, and the most advanced passing system ever seen in a FIFA title is designed to improve match-flow and control the intensity of the game in which you play, so you can focus on what's really important: scoring goals. Defenders no longer back off, and forcing the ball into a crowded penalty box is no longer an option - their positioning has been improved and now more passes are 'weighted', meaning it's harder for a defender to block your attempted pass.**
