In the meantime, the developers have released a major update for the player base. After some hands-on time with it, I can say that it is a solid update for the game. It adds new features, fixes some issues, and itÂ . The update includes the new blue suns feature that our April 20th update introduced. Each light source in the game represents a planet. Upon reaching the planet, the update will reveal the blue sun. This means that no more three suns shine upon each planet. The update adds a new blueprint mechanic that comes in-hand with five new materials that can be forged to create new advanced blueprints. The update also introduces new weapons, communication devices, in-game story (which comes with a new cut-scene system) and a new viewport mode. It's a good update and the launch date for No Man's Sky will be the same as the release date for now, August 9th. If you want to check it out for yourself, you can download the update for free on Steam. . I will now begin by letting you know the rules of the battle. Your strongest ships will be built from combinations of different types of modules. Each ship can only have a certain number of modules, however, it is possible to have a mixture of various modules, in order to build a ship with a specific function. Note: . Modules can be exchanged for resources. . Uploaded modules can be added/modified by pressing the X button. . Modules, too, can be removed by pressing the X button. . The "Remove Module" function can be used to immediately remove a "Perfect Module" or a "Max. . The UFO built by atr1.exe can be upgraded via CODEX. . Note: . CODEX. . CODEX and CODEX can be bought from the No Mans Sky NEXT shop, after the seventh mission. . Note: . Prices are in Racks. . You can see the location of the CODEX and the CODEX on the map by selecting the search tool. . When you hit the CODEX, you will automatically start at the task of building the CODEX, and the progress will be shown on the bar beside the "Process" time. Then, you'll be able to select it and activate it. . Note: . The brightness of your screen affects the display of the module type. . With regard to the UI, the screen resolution will affect the clarity of the image. . The color of the mod depends on the color of the ship. . Resolution and pixel placement are not connected. . No Man's Sky's information display may not appear properly if the UI is displayed in a smaller resolution. . The display range is limited to the screen. . The resolutions and types of modules are identical. . There is a slight change in resolution when a module is added. . The resolution is reduced by 50% when four or more modules are connected. . The size of a module will appear to have changed. . Please confirm whether the module to be removed is a "Perfect Module" or a "Max.". . When you delete the "Perfect Module," the data are deleted immediately. However, the type of the module can be used again as a base. . The maximum number of modules you can select when you encounter a CODEX is always one. . In order
