Meet Thomas, an ordinary man condemned to live his life in an extraordinary way. On his way from a simple desk job to the office, the simple man encounters a cat, a dog and a very strange lady with an umbrella...who insists that he take her for a stroll. However, there are no frills or distractions in life to stop Thomas, no matter where he goes. There is only the road - and hope for a miracle. The Franz Kafka Videogame is developed by a small French studio, based in Paris. With a team of only five people at work, this is no average indie developer. The studio is headed by Jean-Jacques Intravillier, former lead artist at LucasArts. As lead developer of this game, he crafted his first game, Bit Trip Beat, a small puzzle platformer with a bit of humorous dark humor. That game has been recognized with the Best Indie Game 2010 award. Jean-Jacques Intravillier cites various influences on his creativity, from the surrealist surrealists to Mr. Gaiman's fantastic novels, and of course, film art. Given the nature of this game, there are one or two references to Franz Kafka and the literature that inspired him. The Franz Kafka Videogame: Played by you - The Franz Kafka Videogame is a point-and-click adventure. You control Thomas and only Thomas. Just like Thomas, you don't have a traditional 'play as' character and you can't change Thomas physically. Except that, through clever navigation with the mouse, you can interact with the world. - The world that Thomas inhabits is a hyper-realistic, hand-drawn one, full of details and secrets. From the humble interior of the office building to the rain-drenched streets and the odd man who follows you, everything in the world is rendered with care. It helps that the game has a background soundtrack made in the same style. - Thomas is an ordinary man who is pushed beyond his limits. He is confronted with peculiar and strange people and things. To get out of those situations, he uses logical thinking and his wit. The plot is built around revealing the secrets of a world in which such playful behavior as skipping, opening doors with nothing but a key and talking to strange people are commonplace. - The story starts with a solitary man whose simple life is stopped in its tracks by a cat, a dog and a very strange lady with

The quantum transducer has been built at the University of New South Wales A system that can turn the quantum states of atoms into regular light has been shown for the first time, a new study says. The light is a photon, a particle of light that can exist in different states of vibration. Two researchers say this suggests the "atom-light" device, devised at the University of New South Wales, Australia, could have wide-ranging applications in quantum cryptography and quantum computing. The device is the first of its kind. In a paper published in the journal Nature, the scientists say they were able to "switch" the two quantum states of a single atom. A quantum state is the combination of energy and probability for a particle or quantum object. Before the Australian device, physicists have had difficulty producing an atom that could retain the properties of two such quantum states simultaneously. "There are lots of applications for the device we have been able to demonstrate," said lead researcher Anthony Fowler. "It is possible we could use it to 'store' a classical signal

## What's new:

**Global "Euforia HD Global" is the tenth episode of the eleventh season of the CBS sitcom How I Met Your Mother, and the 190th episode overall. It was broadcast on September 19, 2011. The episode is one of the few of the series' later episodes to be co-written by series creators Carter Bays and Craig Thomas. It is the first of three episodes surrounding the death of character Ted's mother, Kristin—which occurs off-screen, and within the first few minutes of the episode. Guest stars are Jerry O'Connell, Nick Zano, and Rob Huebel. Plot The gang makes a late hour flight to Cleveland, in order to spend time with their grandmother Robin's former best friend Bella. The trip takes two days, as they each want to spend time with Bella before Ted pays her a visit. During the flight, Barney and Robin bond as they discuss their respective difficulties finding a new apartment, Barney having just separated from Robin, and Robin having just moved out of his apartment. Robin meets Bella while Barney is busy dealing with a friend who has just gotten into a ticket tout scam that pays for people's travel to specific destinations as long as they take pictures of their trip. While Bella has no memory of Ted, Barney tells her the story of how he met her before she was married to Ted (Bella had been Ted's girlfriend when Barney and Robin were in high school). After the flight, Barney and Robin visit the apartment, during which a group of teenagers move in, causing issues for them. At their grandmother's suggestion, Ted and Barney have a one-night stand while she pays the rent, something that, according to the boys, is the perfect way to lose their virginity. Meanwhile, Ted, after having a long talk with the dead Kristin, meets with the woman about her past in a hidden palm reading parlor in New York, where the woman reveals that she stopped meeting with Ted after Mother's death because her clients refused to give her more money after her message was misinterpreted. Ted gives the woman the large sum of money she asks for and leaves, accompanied by his father. There, he talks to his father and explains everything to him—how he met Kristin, what his mother's prediction actually meant, and the state of his relationship with Robin now that he's happily married. The two go out to dinner, where when Ted breaks the news that he is now engaged to**
