What's New In?

This is a CD/DVD. The reason I created this program was because many people are asking for this but none I see have ever come up with a program that can give them what WinSafe XP does. The main idea is to try and make it as easy and quick to clean your computer off the "hijackers, worms, viruses, Trojans etc." than any other program. No need to run this in the background or when you're doing other tasks. It's also smaller than most other products and offers many features with one CD. WinSafe XP includes all the basic virus/Trojan, Spyware, Worms etc. removal tools that you would need when trying to remove such a program. WinSafe XP contains Rescue discs that will allow you to boot to your Windows files or to Safe Mode if needed. WinSafe XP also contains a feature to help you with quick and easy Registry tweaks. WinSafe XP also contains a feature to help keep your computer from locking up. This is great if you play games or do other things and your computer locks up. WinSafe XP also includes a feature to help you with playing video games. All this is included for FREE on one CD and comes with a Wizard that will help you learn how to use each and every tool. The tools in WinSafe XP also remove the blue screen problem where older programs give you an blue screen with the message "your software stopped working" or something like that. The program is NOT a virus. It only removes viruses, not infections in the hijacker/Trojan/virus sense. When it comes to clean ups I also include Firewall, Auto Update and Antivirus programs with the WinSafe XP CD. You don't really need these programs for WinSafe XP, but it is nice to have. I put them on the CD to help protect your computer in the event that someone were to get a hold of your computer while you weren't looking. Most people I sell this to don't use a Firewall. For the price of this program you could get another Firewall and 3 or 4 more programs. WinSafe XP Description: This is a CD/DVD. The reason I created this program was because many people are asking for this but none I see have ever come up with a program that
