is available in
Windows and
macOS. The
Windows version is
known as Autodesk
AutoCAD 2018.

Design web
browser AutoCAD
has a software-

based web browser
to deliver CAD
information to the
users, as well as a
browser plug-in for
web browsers. The
software-based web
browser, called CAD
Web Browser,
allows web-based
analysis and
design, providing
efficient ways to

share design information through the web. Its platform is currently supported by the Windows, Mac, Linux and Android platforms. In 2019, Autodesk introduced a redesign of the CAD Web Browser as well as a new

Windows browser
called RDX. User
interface The user
interface, known as
Classic user
interface (UI) in
AutoCAD, has been
redesigned in 2002,
as part of the
release of AutoCAD
2002, and is based
on the web browser
interface that is

also used by the later releases of AutoCAD. The user interface also has a command palette, which includes commands that are not found in the right click menu. User interface controls are available for the selection and

placement of objects. They include such controls as the Draw, Edit, Select, Zoom, Annotate, Model and Palette groups, and the Window group, which contains the Screen, Layers, Windows, Spacebars and

Dimensions groups.
The Window group
also includes the
Minder function,
which shows
wireframes.

AutoCAD supports
the keyboard
commands to
navigate in the user
interface. These
include commands
such as Moving,

Rotating, Zooming,
Rotating,
Translating and
Moving the screen.
It also supports the
right-click options
for selection and
placement. Since its
introduction, the
user interface has
been updated
several times. The
2006 edition

introduced a new Ribbon interface, which replaced the original menu-based user interface. The Ribbon interface has several different panels, such as the Properties, Properties, Help, View, and Options,

all of which provide
different types of
information. It also
included an
enhanced
command palette,
