A: Take this code and modify it so it outputs the entire list for debugging and also take it out and add it to your download logic: Private Sub DownloadListItems_Click(sender As Object, e As EventArgs) Handles DownloadListItems.Click Try 'Add your download logic here: For Each toDownload As IO.Net.DownloadData In DownloadListItems.Items toDownload.DownloadTo(Path.Combine(Path.GetDirectoryName(toDownload.DownloadFileName) & Application.StartupPath & "" & toDownload.DownloadFileName), Application.StartupPath &

```
toDownload.DownloadFileName) Next  
DownloadListItems.Items.Clear()  
DownloadListItems.Refresh()  
MessageBox.Show("Download  
Complete!") Catch ex As Exception End  
Try End Sub I hope this helps
```

The invention relates generally to a method of sealing a connection between two connector halves. BPA connectors are utilized for connection purposes. The BPA connector can be pre-assembled with wire insulation stripped from a wire. The wire insulation is on a portion of the wire that extends past the connector. The connector is received into a connector housing with the wire insulation not yet in the connector housing. The wire is received into the connector housing but not with the wire insulation strip in the connector housing. Thereafter, an outer nut is threadably attached to the connector housing to surround the connector housing to cover the BPA

connector and any wire insulation within the connector housing. The outer nut is positioned to cover the BPA connector and any wire insulation within the connector housing. The outer nut is tightened on the connector housing. In the prior art
