Do you have any suggestions? 1001formasdemotivaralosempleadospdf. 1001-formas-de-motivar-a-los-empleados-pdf-88f0d38 It is natural to wish to ensure that the race tracks between man and machine are not only safe for both parties, but are an entertaining source of pride and joy for each party. To help reduce the number of accidents on the road, official traffic enforcement has been used to raise awareness. With the rise of Intelligent Transportation Systems (ITS), the United States has seen a significant decrease in deaths by accidents on the road. In the early stages of the ITS era, however, intelligent transportation systems are still in their infancy. As such, the most important and challenging task ahead of ITS is to increase road safety. Evaluating the current status of ITS applications is important to improving road safety in the US. The ITS application is a critical component of the Intelligent Transportation System (ITS). As such, ITS provides useful information that will reduce accidents, improve road safety and improve road traffic. ITS application integrates all the functions of vehicles, such as automatic speed adjustment, road guidance, emergency warning, traffic information and automatic vehicle maintenance, for safer road traffic. Including a variety of information, such as traffic volume, road conditions and costs, and safety information. As compared to computer and mobile applications, ITS has an advantage in that they are better able to acquire information and deliver a warning in an emergency situation. Intelligent Transportation Systems Application is a key sector of ITS and therefore, ITS application is being conducted with the aim of reducing accidents by improving road safety.
