## Diablo2heroeditoritempack113

July 22, 2021 - A bridge design pattern is a type of structural pattern that decouples an abstraction from its implementation.

Because of the separate hierarchy. The bridge design pattern suggests that you can define a class that has both abstract and concrete methods, but only one concrete method that implements the abstract method. So an abstract method can be implemented with one concrete method and its implementation. This method can be implemented using several separate classes. dd2bc28256
