This is an app that not only guides you to buy groceries, but also reminds you what to buy with your 'wrist' time. For example, my shopping list is: 2 kg onions 2 kg potatoes 4 kg tomatoes 2 Tbsp ginger/2 Tbsp garlic/1 Tbsp turmeric Here's what it says on their website: "Don't feel like shopping for groceries at the grocery store? While few of us can craft a fabulous meal from scratch every night, we can have a weeknight dinner on the table in about a half-hour. Being on time is an important element in our busy lives, but there are still ways to cut out your stress. What we eat (and how we cook it) can make a huge difference, so we compiled a list of healthy meal ideas to help you create tasty, healthy meals that don't take forever to make. These ideas for dinner and side dish recipes include low-calorie, gluten-free, and can be made in 30 minutes or less! It's important to eat a well-balanced diet each day, and there are ways to do that even when you're pressed for time. You can use any recipe that you like, but keep these ideas in mind as you come up with your own ideas for weeknight meals." This prompts me to buy only onions and potatoes, and automatically you get 'onion alert' in the next five minutes. When you go to a store, they will usually have a list of the items available in the store that you can choose from, but the prices of everything else in the store may be different than what you have listed on your shopping list. You can also add the brands and the specific item you want, if you want. This app is a great when you are preparing for a puja, and everything you want to use or cook needs to be in the same location. You can arrange your puja items to be your grocery list, and then you can go buy everything required on your shopping list.
