You can use Instagram as a template image, or you can create photo manipulations that you want to apply back to an image. It is possible that a template image is not exactly the same size as the source image. It’s also likely that the image contains text. Instead of cutting out the text and adjusting the template image to match up with the source, you would re-write the text in the template image. In the same way that you might not be able to use only one of two exact sizes of your brand image, you may not have any stock photos of your product or brand that are exact, and you might have to alternate between the two.
